

32HL512D-B 8MP Diagnostic Color Monitor

▶ 32HL512D-B

8MP Diagnostic Color
32" Class (31.5" Diagonal)

A DISPLAY DESIGNED FOR DIAGNOSTIC READING

This 31.5" 8MP monitor is FDA approved for the display of radiological images for review, analysis and diagnosis*. Lightweight and affordable with excellent image quality makes 32HL512D the ideal solution for home and reading room use.

* The 32HL512D monitor is not intended for mammography.

FEATURES

DICOM READY

- The 32HL512D is DICOM Part 14 factory calibrated to primary diagnostic guidelines. Internal backlight sensor dynamically measures and adjusts LED backlight power to maintain target DICOM brightness over time.

LG NANO IPS™ TECHNOLOGY

- The LG Nano IPS technology in this monitor enhances the on-screen colors and grays. Nanometer sized particles within the LED backlight absorb excess light wavelengths to provide high DICOM accuracy and crisp reading experience.

SUPERIOR COMPATIBILITY

- PBP (Picture By Picture) mode enables two 4MP screen operation to work with PACS applications. DisplayPort and HDMI video inputs allow easy connection to workstations or laptop computers. Monitor supports Nvidia, AMD and Intel graphics.

STREAMLINED DESIGN

- This monitor has 4-sided virtually borderless design and no distracting visible front buttons or logos. Its OneClick stand and light weight construction allows fast and nearly effortless deployment. The monitor has height, tilt and +/- 90° pivot adjustability to accommodate multiple landscape or portrait configurations.

SPECIFICATIONS

Designed for Radiology Workflow

LG Nano IPS™ LCD

Native Display Resolution: 3840 x 2160

Picture by Picture Feature

Brightness: 450 cd/m²

Contrast Ratio: 1300:1

Response Time: 14ms

Brightness Stabilization

Tilt / Height / Pivot Adjustment

FDA 510(k) Class II Approval

Medical Safety Approval

TAA Compliant

3-Year SWAP Warranty
